

CONFIDENCE IN IMPLANTS COURSE

COURSE BROCHURE

21 Apr 2023 - 6 Jan 2024

Supported by

**Dentsply
Sirona**

SUMMARY

9 day hands-on single implant course for dentists interested in getting started in implants and those wanting to improve their technique.

Features

- 9 day course with 5 days of live surgery
- Packed full of hands-on practicals
- Treat your own patients
- Learn 10 key principles for success
- Expand your treatment repertoire
- Predictable techniques to reduce stress
- Mentorship during and after the course
- Course follows FGDP guidelines
- FREE Ankylos prosthetic kit
- Taster evening

Aim

To enhance a practitioner's knowledge and skill level for confident planning, placing, restoring and maintenance of single implants with GBR.

Objectives

- To demonstrate thorough implant examination and treatment planning.
- To demonstrate predictable implant placement, restoration, and long-term management.

Booking

This course has a limited number of places (12) so please book early to avoid disappointment.

OVERVIEW

Confidence in Implants is a 9 day single implant course where all dentists are welcome and no previous experience in implants is necessary. This course is for anyone interested in getting started in implant dentistry through to those who are already placing and want to improve their skill set.

Since we are three practising implant dentists, we realise how essential it is to create confidence when approaching implant surgery, so this course is packed full of hands-on practice with all the flicks and tricks. There will be live surgeries on 5 days where you are able to treat your own patients. The focus is on safe, predictable surgery that's enjoyable for the dentist and gives the patient the best result.

The course will look at single implant examination, treatment planning, the treatment letter, and the consent process. Show you how to surgically extract teeth with minimal bone loss. Demonstrate how to aseptically set up for surgery. Go through the 10 key principles for surgical success. Show you how to predictably place an implant with guided bone regeneration. You will learn how to manipulate soft tissue to enhance results. Demonstrate how to construct an implant temporary crown, uncover the implant, take an implant impression, and restore the single implant. We will discuss how to avoid and manage complications.

You are encouraged to bring at least 2 of your patients to the course to place and restore the implant. There will be a personalised online portfolio to complete to record your progression. There will be time for individuals to have one-to-one feedback sessions to enhance learning during and after the course has finished. The course can be taken as a whole, or an individual day can be selected.

Your nurse is welcome to come on day 2 to learn aseptic technique alongside you. Add on days to improve your dental photography skills (by John Joe Hartigan) and an implant sales and communication day suitable for all team members (by Adam Jaffa) are available.

The course principle is to create a secure, confidential environment for learning and to develop an understanding of safe surgery and working within our capabilities as part of a career long learning pathway.

CONFIDENCE IN IMPLANTS COURSE

STRUCTURE

Dates	21Apr 2023 - 6 Jan 2024 (9 Days)
Speakers	Claire McMullan BDS MJDF (Eng) Chris Gardiner BDS MFDS (RCSEd) MSc DentImp Manc Lucy Stock BDS Dip ImpDent RCS(Eng)
Coordinator	Adam Jaffa
Participants	Limited to a maximum of 12 delegates
Cost	£600 per day £5,400 for the course
Content	Single implant course based on the Dentsply Ankylos Implant System. The course follows FGDP 2016 guidelines.
Pre-Course	To get the most out of this course there's an initial questionnaire to see where you are starting from and what you want. There are also pre and post delegate assessment sheets to monitor the course effectiveness.
